

Ideation Phase
Define the Problem Statements

Date	28-06-2026
Project Name	Software Installation Request Automation
Team ID	
Maximum Marks	

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An employee (end-user).	Request the installation of licensed software on my device.	The process involves delays, manual coordination, and I have no visibility into the request status.	There is no centralized service catalog, standardized workflow, or dynamic approval process.	Frustrated by the wait times and anxious because the delay impacts my ability to do my daily work.

PS-2	An IT Support team member / Manager (Approver).	Review requests for compliance, enforce policies, and quickly install software on user devices.	I spend excessive time tracking down incomplete request data and dealing with manual coordination errors.	The request intake is not standardized, and there is no automated system to enforce mandatory fields and route approvals.	Overwhelmed by administrative overhead and stressed because manual tracking takes time away from critical IT tasks.
